Home Exercise Program
Updated January 9, 2026

Patient	Jessica Webb
Date of birth	November 12, 1977
Referring physician	Dr. Angela Turner, Midtown Family Health
Diagnosis	Status post right knee arthroscopic meniscus repair, 2024
Current status	Occasional stiffness, good range of motion, maintenance phase
Frequency	3 times per week, plus cycling as tolerated

Home Exercise Program

Exercise	Sets and reps	Notes
Straight leg raises	3 x 12	Keep knee locked, slow lower
Quad sets	3 x 15	Hold 5 seconds each
Hamstring curls (band)	3 x 12	Light band, controlled
Step ups, 6 inch	3 x 10	Watch knee tracking
Wall sits	3 x 30 seconds	Stop if sharp pain
Standing calf raises	3 x 15	Both legs
Stationary cycling	15 to 20 minutes	Low resistance, warm up

Guidance from Karen Soto, DPT

Jessica, your knee is doing well. The Brush Creek rides are excellent for it, keep them at a comfortable cadence and avoid heavy hill repeats for now. Ice after a long teaching day if it feels warm. We do not need a follow up unless symptoms change. Standing for long lessons is fine, just shift your weight and take a short walk every hour.

Next reassessment: only as needed. Call the front desk to schedule.
