BRIDGEPORT AVENUE ELEMENTARY · FAMILY WELLNESS CORNER

The Five Food Groups

Fall Festival · Friday, October 30, 2026 · 5:00-7:00 PM · Front Playground

Walk the food-group tables with your child and match them to the poster our 4th graders made in their nutrition unit - same five groups, same order, in their own words. A healthy plate has a little from each group.

GROUP 1

Proteins

"Helps your body fix itself when you get hurt."

At the table: meat, fish, eggs, beans, nuts

GROUP 2

Fruits

"Has lots of fiber to keep your tummy healthy and happy."

At the table: apples, grapes, melon, banana

GROUP 3

Dairy

"Helps your bones and teeth, because of the mineral calcium."

At the table: milk, yogurt, cheese

GROUP 4

Vegetable

"Helps your skin look good and keeps you glowing."

At the table: carrots, broccoli, salad greens, corn

GROUP 5

Grains

"Helps to give us energy."

At the table: breads, cereals, pasta

Build a balanced plate: a little from all five groups.

Food groups, order, and the "why it matters" lines come straight from the 4th-grade nutrition poster on display.
