Vitamin D	28 ng/mL	30 to 100	Slightly low
TSH	2.1 mIU/L	0.4 to 4.0	Normal

Provider Notes

Jessica is in good health. Right knee is stable after the 2024 repair and she keeps up with cycling and PT. Reports mild tinnitus, now using custom earplugs at every gig, which is the right step. Vitamin D is slightly low, start 2000 IU daily and recheck next year. Discussed sleep on late performance nights and stress around the school finances. No medications needed. Next annual physical due January 2027.

Immunizations current. Mammogram on schedule per prior records.
