Allergy Action Plan

Gables Health Medical Group, Pediatrics | 2780 Douglas Road, Coral Gables, FL 33134 | (305) 555-0400

Patient: Daniel Brooks-Mitchell | DOB: 03/14/2016 | Plan Date: January 12, 2026

Provider: Maria Castillo, MD | Allergy: Tree nuts (almond, walnut, cashew, pecan)

History and Severity

Mild reactions only: oral itching and scattered hives on two prior exposures. No history of anaphylaxis, no respiratory involvement. Epinephrine not currently prescribed based on history; reassess at the next annual visit.

Daily Management

Step	Action
Avoidance	No tree nuts or foods with tree nut warnings. Peanut is tolerated and not restricted.
School lunches	Family-provided lunch preferred on outside-food event days.
Label reading	Daniel knows to ask an adult when unsure. Reinforce at home and school.

If a Reaction Occurs

Symptoms	Action
Itchy mouth, a few hives, no other symptoms	Give cetirizine 10 mg by mouth, observe for one hour, call parent.
Any breathing difficulty, facial swelling, vomiting, or widespread hives	Call 911 immediately, then call parents. Do not wait.
