Gables Health Medical Group, Visit Summary

2780 Douglas Road, Coral Gables, FL 33134 | (305) 555-0400

Patient: Michelle Grace Brooks | DOB: 11/17/1980 | Visit Date: November 14, 2025

Provider: Sandra Whitfield, MD | Visit Type: Annual physical examination

Vitals

Measure	Result	Reference
Blood pressure	138/88	Below 120/80
Heart rate	72 bpm	60 to 100
BMI	24.1	18.5 to 24.9

Assessment

1. Elevated blood pressure, first reading above target range at two consecutive visits. Lifestyle modification recommended before considering medication, in light of family history of cardiac disease (father, heart failure).

2. Migraine, stress-triggered, one to two episodes monthly, stable on sumatriptan as needed. Patient tracks triggers carefully.

3. Sleep duration averaging five and a half to six hours, with early waking. Discussed sleep hygiene, occasional melatonin use acceptable.

Labs

Comprehensive metabolic panel within normal limits. Lipid panel: LDL 128, borderline. All other values within normal limits.

Plan

Reduce dietary sodium, maintain three treadmill sessions weekly, target seven hours of sleep. Sumatriptan 50 mg refilled, twelve months. Blood pressure recheck scheduled October 29, 2026. Patient may schedule sooner if home readings exceed 140/90.
