GREATER ATLANTA WORSHIP CENTER

Facilities — Contractor Handover Procedure
Rev 4 | effective 1 August 2026 | owner: Pastor Michael Hayes

3.1 Scope of record

Every contracted works package on church property runs against a single approved change record. That record, and nothing else, is the scope. Verbal additions from a committee member do not widen it.

3.2 The handover check

When a vendor presents a package as finished, a handover check is raised as a facilities incident against the change record. The music director or the facilities owner walks the room and verifies each lettered item of the approved scope on site. The check is signed off only when every lettered item is verified present and finished.

3.3 The vendor's own note is not evidence

A completion note, a sign-off sheet or a verbal from the vendor is a claim, not evidence. It is never accepted in place of the walkthrough. Where the note and the walkthrough disagree, the walkthrough stands and the approved change record governs.

3.4 Refusing a handover

Where the walkthrough finds any lettered item outstanding, the handover is refused. Set the handover check ticket to On Hold, which is state 3, and raise it to priority 1 for as long as a booked sanctuary event is at risk. It stays at On Hold and priority 1 until the vendor re-presents and a fresh walkthrough clears it. Record the outstanding lettered items on the ticket so the vendor sees them.

3.5 Booked events

A booked sanctuary event is not moved to a room that cannot hold it. Tuning and regulation work on the sanctuary grand happens in the sanctuary; the instrument is not carted between rooms for a service visit, and no other room on site holds a grand. Where the room cannot be released, the booking is released and rebooked.

4.1 Change orders

A change-order invoice is reviewed against the approved change record before any release. Nothing is released on a verbal from a committee member, and nothing is released while the handover it belongs to is refused. Releases follow the standing approval thresholds without exception.
