Fall Building Condition Inventory - Principal certification

To: Building principals
From: Marta Reyes, Facilities Coordinator
Date: October 5, 2026

Our annual building condition inventory feeds the fire marshal occupancy file and the district insurance renewal, so the room records have to match the rooms as they stand this fall.

Please review each instructional room on your building readiness board and confirm the recorded condition against the room as it is now. Where a room was altered over the summer, correct the record so it reflects the current state, and certify the room. A one page condition summary for any room that changed should accompany your certification.

All certifications are due to this office by Friday, October 16. Reach out if a room needs a facilities follow up before you can certify it.
