Ridgevale Physical Therapy

310 Vale Street, Thornfield, NJ 08540 | (609) 555-4477

TREATMENT SUMMARY AND HOME PROGRAM

Patient: Dorothy Langston. Date of birth: November 8, 1977. Treating therapist: Lisa Park, DPT.

Summary date: February 27, 2026. Referring physician: Dr. Anita Morris, Thornfield Wellness Associates.

Assessment

Chronic tension in the right upper trapezius and cervical region, consistent with sustained computer work and prolonged desk posture. Symptoms are aggravated during grant writing periods and long manuscript sessions. Ballet practice on Tuesday and Thursday evenings is well tolerated and appears protective for thoracic mobility.

Plan of care

Course of eight visits, one per week, on the last Friday emphasis schedule, with re-assessment at visit four. Manual therapy to the cervicothoracic junction, scapular stabilization, and a home program maintained daily alongside her existing yoga routine.

Exercise	Sets and reps	Frequency
Chin tuck with band	3 x 10	Daily
Scapular retraction	3 x 12	Daily
Upper trapezius stretch	Hold 30 sec, 3 each side	Twice daily
Thoracic extension over roll	2 minutes	Daily
Wall angels	3 x 10	Five days per week

Next session: last Friday of the month per standing schedule. Contact Lisa Park to reschedule. This summary is shared with the patient and the referring physician only.
