PEDIATRIC HEALTH SUMMARY
Patient: Marcus Renee Giles
Date of Birth: March 18, 2021
Medical Record Number: HPA-2021-7140
Primary Provider: Dr. Rachel M. Adams, M.D., FAAP
Parent / Guardian: Shanice Renee Giles, (860) 555-0101
Summary Prepared: October 14, 2026 (at 5-year well-child visit)
GROWTH AND DEVELOPMENT
Age at this visit: 5 years, 6 months
Height: 44.5 inches (113 cm) -- 65th percentile for age and sex
Weight: 43.2 lbs (19.6 kg) -- 58th percentile for age and sex
BMI: 15.4 -- within normal range (48th percentile)
Head circumference: not measured at this age group
Blood pressure: 90/58 mmHg -- normal range for age
Growth trend: Marcus has followed a consistent growth curve across all visits since infancy. Height and weight
have tracked between the 55th and 68th percentiles throughout. No growth concerns.
Development: Passed all developmental screening items on the Ages and Stages Questionnaire, Third Edition
(ASQ-3) administered at this visit.
Communication domain: Above expected range. Vocabulary is rich and expressive. Uses complex sentences and
demonstrates strong narrative ability.
Gross Motor domain: Within expected range. Hops, skips, catches a ball, and climbs appropriately for age.
Fine Motor domain: Within expected range. Draws recognizable figures, cuts on a line with scissors, and is
beginning to write letters.
Problem-Solving domain: Above expected range. Demonstrates strong logical reasoning and categorization skills.
Personal-Social domain: Within expected range. Plays cooperatively, shows empathy, and follows multi-step
instructions in group settings.
No developmental concerns identified. Marcus is thriving developmentally.
MEDICAL HISTORY
Birth history: Full-term vaginal delivery, 39 weeks and 3 days. Birth weight 7 lbs 6 oz. No complications.
Neonatal period: Unremarkable. No NICU admission. Discharged at 48 hours with mother.
Hospitalizations: None.
Surgeries: None.
ER visits: One (February 2023) -- laceration on left chin from a fall; 3 sutures; healed without complication.
Previous diagnoses: Atopic dermatitis (eczema), first noted at 4 months, managed topically throughout.
Allergies: No known drug, food, or environmental allergies. No allergy testing performed to date.

ATOPIC DERMATITIS (ECZEMA)
Status: Mild and well-controlled.
Distribution: Primarily at the antecubital fossae (inner elbows) and popliteal fossae (behind the knees). Occasional
patches on the torso in winter months.
Current management: Daily emollient application with CeraVe Moisturizing Cream (in the tub), applied after
bathing while skin is still damp. Fragrance-free laundry detergent in use. Gentle soap (Dove Sensitive Skin or
equivalent).
Flare management: 1% hydrocortisone cream applied twice daily for up to 5 days during flares. Parent reports
flares occur approximately 1 to 2 times per month, typically triggered by dry air (winter), sweating, or a new fabric.
Flares are brief and resolve with the hydrocortisone regimen.
Last notable flare: October 2026 (night of October 12 to 13; resolved by October 16 with routine management).
Referral: No referral to pediatric dermatology indicated at this time. If flares become more frequent, extensive, or
unresponsive to topical steroids, referral will be considered.
Parent education provided: Continued importance of daily moisturizing, warm (not hot) baths, fragrance-free
products, and early intervention at the first sign of a flare to prevent escalation. Parent demonstrates excellent
management and knowledge. No concerns.
IMMUNIZATION RECORD
Vaccine | Date Administered | Lot Number | Administered By
Hepatitis B (1st) | March 18, 2021 | HB21-447A | Hartford Hospital Nursery
Hepatitis B (2nd) | May 12, 2021 | HB21-882C | Hartford Pediatric Associate
DTaP (1st) | May 12, 2021 | DT21-119B | Hartford Pediatric Associate
IPV (1st) | May 12, 2021 | IP21-334D | Hartford Pediatric Associate
Hib (1st) | May 12, 2021 | HI21-221A | Hartford Pediatric Associate
PCV13 (1st) | May 12, 2021 | PC21-667B | Hartford Pediatric Associate
Rotavirus (1st) | May 12, 2021 | RV21-004C | Hartford Pediatric Associate
DTaP (2nd), IPV (2nd), Hib (| July 14, 2021 | Multiple | Hartford Pediatric Associate
DTaP (3rd), IPV (3rd), Hib (| September 8, 2021 | Multiple | Hartford Pediatric Associate
Influenza (annual) | October 2021, 2022, 2023, 20 | Multiple | Hartford Pediatric Associate

Hepatitis A (2nd) | September 14, 2022 | HA22-771A | Hartford Pediatric Associate
MMR (1st), Varicella (1st), | March 21, 2022 | Multiple | Hartford Pediatric Associate
DTaP (5th booster), IPV (4th | October 14, 2026 | Multiple | Hartford Pediatric Associate
Immunization status: Current as of October 14, 2026. All recommended vaccines for age completed per CDC and
ACIP schedule. No parental objections on file.
VISION AND HEARING
Vision screening (Spot vision screener): Passed, both eyes, at this visit.
Hearing screening: Passed bilateral pure-tone audiometry at 1000, 2000, and 4000 Hz at this visit. No referral indicated.
SOCIAL AND FAMILY HISTORY
Household composition: Marcus lives with his mother, Shanice Renee Giles, in Hartford, CT.
Maternal

grandmother (Mary Claire Giles) is a regular and primary childcare provider. Father (Derek Watson) is not in the
household; limited contact.
Childcare and school: Attended Maple Hill Early Learning Center through the 2025-2026 school year. Enrolled in kindergarten at
assigned Hartford Public Schools elementary, 2026-2027 school year.
Parent occupation: School principal, Hartford Public Schools.
Tobacco, alcohol, firearms in home: None reported. No tobacco exposure reported.
Safety: Car seat in use and correctly installed (confirmed at 3-year visit; parent to update to booster per height
and weight guidance now). Smoke detectors in home; functioning. Pool or open water: none in the home.
ANTICIPATORY GUIDANCE PROVIDED AT THIS VISIT
Nutrition: Diet appears balanced and varied per parent report. Encourage continued variety. Limit juice to 4 to 6 oz
per day; no sweetened beverages.
Sleep: Age-appropriate recommendation is 10 to 13 hours per night. Parent reports Marcus sleeps approximately
8:30 PM to 6:30 AM on school nights (10 hours). Within range.
Screen time: Recommend no more than 1 hour per day of high-quality programming for ages 5 to 6, with parent
co-viewing when possible. Parent reports approximately 30 minutes daily on school nights.
Physical activity: 3 hours of physical activity per day recommended for preschool age; at least 1 hour of vigorous
activity for school-age. Marcus is active at school and at home.
Dental care: Recommend twice-daily brushing with fluoride toothpaste (pea-sized), flossing, and a dental visit
every 6 months. Parent confirms Capitol Dental Group in use; last visit confirmed.
Safety: Updated to booster seat when rear-facing no longer appropriate. Confirm car seat installation check.
Kindergarten readiness: Marcus appears well prepared for kindergarten per developmental screening. Parent was
encouraged to read together daily and to maintain the library visits she described.
NEXT VISIT
6-month sick visit: As needed.
Next well-child visit (6-year): Target April 2027.
