Measure	Result	Reference
Blood pressure	128 / 82 mmHg	Below 130 / 80
Heart rate	72 bpm	60 to 100
Weight	212 lb	
Body mass index	29.6	18.5 to 24.9
Total cholesterol	214 mg/dL	Below 200
LDL cholesterol	138 mg/dL	Below 100
HDL cholesterol	44 mg/dL	Above 40

Assessment and plan

- Mild high cholesterol. Continue atorvastatin 10 mg once daily. Tolerating well, no muscle aches reported.
- Weight slightly above target. Discussed restaurant lifestyle and irregular meal timing. Reviewed diet changes the patient and his wife already manage at home.
- Reports tight shoulders, occasional tension headaches, and jaw clenching tied to work stress. Encouraged the walking routine the patient already keeps along the East River.
- Repeat lipid panel and follow-up in twelve months. Next annual physical due February 2027.

Prescriptions sent to pharmacy on file. Call the office with any new symptoms.
