N212: Contracted rate adjustment applied per provider network agreement.

CLAIM NOTES

The developmental screening (Ages and Stages Questionnaire) was administered and billed as a preventive service in conjunction with the well-child visit. This is consistent with AHRQ recommendations for 5-year-olds.

Immunizations administered were DTaP (diphtheria, tetanus, acellular pertussis) booster, recommended at age 4 to 6. This completes the recommended immunization schedule for this age group per CDC guidelines.
