ANNOTATED BIBLIOGRAPHY

Ed.D in Educational Leadership -- Dissertation Literature Review
Shanice R. Giles | Hartwick Graduate Institute | Advisor: Dr. Claire Phillips
Working Title: Leading From the Margins: Culturally Responsive Leadership Practices and Student Outcomes in Title I Urban Elementary Schools
Prepared: October 2026

This bibliography includes 22 sources organized thematically. Sources are peer-reviewed articles, books, and research reports selected for their relevance to the theoretical framework, empirical grounding, and methodological approach of the proposed dissertation. Annotations summarize the source, identify the key argument or finding, and note the source's role in the dissertation.

SECTION 1 -- FOUNDATIONAL FRAMEWORKS IN CULTURALLY RESPONSIVE LEADERSHIP

1. Khalifa, M. A., Gooden, M. A., and Davis, J. E. (2016). Culturally responsive school leadership: A synthesis of the literature. Review of Educational Research, 86(4), 1272-1311.

Annotation: This synthesis reviews 33 empirical and conceptual articles to identify four core behaviors of culturally responsive school leaders: critical self-awareness, inclusive school culture, culturally responsive teacher practices, and community advocacy. The authors argue that culturally responsive leadership requires leaders to examine their own biases, disrupt institutional inequities, and actively build school cultures that affirm student identities. This is the primary theoretical framework for the proposed study. The four behaviors map directly to the interview protocol and will be used to organize the findings.

2. Shields, C. M. (2010). Transformative leadership: Working for equity in diverse contexts. Educational Administration Quarterly, 46(4), 558-589.

Annotation: Shields argues that transformative leadership goes beyond transactional improvement and requires leaders to engage critically with issues of power, privilege, and oppression. The article contrasts transformative leadership with distributed leadership models and advocates for a deeper ethical commitment to equity. This source provides an important theoretical complement to Khalifa et al., particularly in framing how leadership philosophy connects to structural critique.

3. Brown, K. T. (2004). Leadership for social justice and equity: Weaving a transformative framework and pedagogy. Educational Administration Quarterly, 40(1), 77-108.

Annotation: Brown proposes a three-part framework for social justice leadership preparation, emphasizing reflective practice, constructivist pedagogy, and community engagement. The article includes a detailed review of the literature on social justice leadership and argues that preparation programs must center these skills. This source bridges the Khalifa and Shields frameworks and is used in the theoretical section to establish the pedagogical and ethical grounding of the study.

4. Johnson, L. (2014). Culturally responsive leadership for community empowerment. Multicultural Education Review, 6(2), 145-170.

Annotation: Johnson examines how principals in diverse urban schools build bridges between school and community by learning from community members, incorporating local knowledge into school programs, and advocating for community-defined priorities. The article draws on interview data from eight principals and presents specific practices rather than abstract principles. This source anchors the community-advocacy dimension of Khalifa et al.'s framework.

SECTION 2 -- EQUITY, ACHIEVEMENT, AND URBAN SCHOOLING

5. Ladson-Billings, G. (1994). The Dreamkeepers: Successful Teachers of African American Children. Jossey-Bass.

Annotation: Ladson-Billings profiles eight teachers who achieve exceptional results with African American students and identifies culturally relevant pedagogy as a framework that honors student identity, critical consciousness, and academic achievement simultaneously. Although the focus is on teachers, the principles of culturally relevant practice inform how this dissertation conceptualizes the expectations that culturally responsive leaders hold for their instructional staff.

6. Delpit, L. (2006). Other People's Children: Cultural Conflict in the Classroom. The New Press.

Annotation: Delpit argues that progressive pedagogy, while well-intentioned, may fail students from communities of color by withholding explicit instruction in the "codes of power" that mainstream institutions reward. This source provides an essential counterpoint and complicates any argument that affirming cultural identity is sufficient. The dissertation uses this source to establish that culturally responsive leadership must hold equity and academic rigor together.

7. Milner, H. R. (2010). Start Where You Are, But Don't Stay There. Harvard Education Press.

Annotation: Milner examines four teacher-student contexts across racial and economic diversity and identifies the practices that allow teachers to build genuine cultural understanding while maintaining high expectations. The book introduces the concept of the "opportunity gap" as a more accurate frame than the achievement gap. This source is used in the literature review to establish why the school's leadership context shapes opportunity.

8. Horsford, S. D. (2011). Learning in a Burning House: Educational Inequality, Ideology, and (Dis)Integration. Teachers College Press.

Annotation: Horsford draws on oral history interviews with Black educators who lived through school desegregation to examine how the history of segregated schooling shaped both the assets and the inequities that persist in today's urban schools. This source provides essential historical and structural grounding for the dissertation's argument that current inequities cannot be addressed without understanding their origins.

9. Anyon, J. (1997). Ghetto Schooling: A Political Economy of Urban Educational Reform. Teachers College Press.

Annotation: Anyon provides a detailed political economy analysis of schooling in one Newark, New Jersey district and argues that urban school failure is primarily a product of economic disinvestment and political neglect rather than instructional failure. This source anchors the structural context section of the literature review and is used carefully to argue for leadership agency within structural constraints without overstating what school-level practice can achieve alone.

SECTION 3 -- PRINCIPAL LEADERSHIP AND STUDENT OUTCOMES

10. Leithwood, K., Harris, A., and Hopkins, D. (2020). Seven strong claims about successful school leadership revisited. School Leadership and Management, 40(1), 5-22.

Annotation: This updated review of 30 years of evidence on school leadership identifies seven consistent empirical claims, including that leadership is second only to teaching in its influence on student learning. The authors note that leadership effects are largely indirect, operating through school conditions and teacher practice. This source is used to establish the mainstream evidence base for leadership effects before situating culturally responsive leadership within that tradition.

11. Louis, K. S., Leithwood, K., Wahlstrom, K., and Anderson, S. (2010). Investigating the Links to Improved Student Learning. University of Minnesota and University of Toronto.

Annotation: This large-scale multi-state research report examines how district and principal leadership behaviors affect teacher practice and student achievement. Findings confirm significant but indirect leadership effects on student outcomes. The report is methodologically rigorous and provides empirical grounding for the dissertation's central argument about leadership influence.

12. Rodriguez, M. A. (2019). Principal leadership practices and achievement gaps in urban elementary schools. Urban Education, 54(7), 1005-1034.

Annotation: Rodriguez uses a mixed-methods design in five urban elementary schools to examine which specific principal behaviors correlate with reduced achievement gaps. Findings point to instructional leadership, relational trust, and high expectations as predictors of improved outcomes for low-income students of color. This is the most methodologically proximate study to the proposed dissertation and is used to situate this study's contribution.

13. Santamore, W. (2022). Principal leadership and family engagement in Title I schools: A mixed-methods study. Journal of School Leadership, 32(3), 210-235.

Annotation: Santamore finds that principal behaviors, particularly the quality of communication and the degree of genuine family partnership, are strong predictors of family engagement in Title I schools. This source supports the community-advocacy strand of Khalifa et al.'s framework and is used in the discussion of how leaders build school-community relationships.

SECTION 4 -- SOCIAL JUSTICE LEADERSHIP

14. Theoharis, G. (2007). Social justice educational leaders and resistance: Toward a theory of social justice leadership. Educational Administration Quarterly, 43(2), 221-258.

Annotation: Theoharis examines how principals who lead for social justice navigate resistance from colleagues, district offices, and community members. He identifies persistence, moral purpose, and community-building as key leadership responses to resistance. This source is critical for the dissertation because it names the structural and relational barriers that principals face and documents how they resist and persist.

15. Capper, C. A. and Theoharis, G. (2008). Toward a framework for preparing leaders for social justice. Journal of Educational Administration, 46(6), 706-718.

Annotation: Capper and Theoharis propose a set of skills and dispositions for leaders committed to social justice and argue that these must be deliberately cultivated in preparation programs. The article is used in the implications section to consider what the findings suggest for principal preparation and professional development.

16. Skrla, L., McKenzie, K. B., and Scheurich, J. J. (2009). Using Equity Audits to Create Equitable and Excellent Schools. Corwin Press.

Annotation: The authors present a practical equity audit process through which school leaders can identify and address systemic disparities in student access, outcomes, and treatment. The book is used to bridge the theoretical literature with concrete leadership practice and to discuss how the principals in the study use data.

SECTION 5 -- RESEARCH METHODOLOGY

17. Yin, R. K. (2018). Case Study Research and Applications: Design and Methods (6th ed.). SAGE Publications.

Annotation: Yin is the primary methodological anchor for the proposed multi-site case study design. This edition

addresses validity, reliability, construct validity, and data triangulation in case study research. The case study design is justified by the bounded nature of the units of study (individual schools and their principals) and the explanatory nature of the research questions.

18. Patton, M. Q. (2015). Qualitative Research and Evaluation Methods (4th ed.). SAGE Publications.

Annotation: Patton provides comprehensive guidance on qualitative methods including purposeful sampling, semi-structured interviewing, observation, and document analysis. The interview protocol design draws directly on Patton's guidance on open-ended question structure and probing technique.

19. Merriam, S. B. and Tisdell, E. J. (2016). Qualitative Research: A Guide to Design and Implementation (4th ed.). Jossey-Bass.

Annotation: Merriam and Tisdell offer strong guidance on trustworthiness in qualitative research, including member checking, triangulation, and reflexivity. Their framework for naturalistic inquiry complements Yin and grounds the study in an interpretivist paradigm.

20. Maxwell, J. A. (2013). Qualitative Research Design: An Interactive Approach (3rd ed.). SAGE Publications.

Annotation: Maxwell presents an interactive model that emphasizes the relationship between purpose, conceptual framework, research questions, methods, and validity. This source is used in the methodology chapter to explain and justify the alignment between the dissertation's research questions and the case study approach.

21. Creswell, J. W. and Poth, C. N. (2018). Qualitative Inquiry and Research Design: Choosing Among Five Approaches (4th ed.). SAGE Publications.

Annotation: Creswell and Poth compare grounded theory, phenomenology, case study, ethnography, and narrative inquiry. This source is used to articulate why a multi-site case study design is more appropriate than a phenomenological or ethnographic approach given the bounded, comparative nature of the inquiry.

SECTION 6 -- FAMILY AND COMMUNITY ENGAGEMENT

22. Oyserman, D., Brickman, D., and Rhodes, M. (2007). School success, possible selves, and parent school involvement. Family Relations, 56(5), 479-489.

Annotation: Oyserman and colleagues examine how identity-based motivation shapes both student academic self-concept and parent engagement in schooling. The study finds that when parents are helped to construct a school-success identity, their engagement increases and student outcomes improve. This source supports the discussion of how culturally responsive leaders frame family partnership in ways that honor parent identity and build genuine investment.
