Astoria Pediatric Associates

Visit Summary

Patient: Sarah McGee DOB: December 2, 2016 Age: 9

Guardians: Carlton McGee and Ellen McGee

Visit date: February 17, 2026
Provider: Dr. Anne Sullivan
Reason for visit: Asthma follow-up

Assessment

- Mild intermittent asthma, well controlled. No nighttime symptoms reported. No emergency visits since the last check.
- Albuterol inhaler used as needed, roughly twice per month, mostly with spring allergens and hard exercise at gymnastics.
- Growth and development on track. Lungs clear on exam today.

Plan

- Continue albuterol inhaler as needed. Refill sent to the pharmacy on file.
- Spacer technique reviewed with the patient and her parents.
- Keep one inhaler at home and one in the gymnastics bag.
- Routine follow-up in six months or sooner if symptoms increase.
